MAJA Token – The Cryptocurrency Response to Legalization of Cannabis.

Daniel Olav

Submitted 11 June 2021

1.0 Mission Statement

MAJA Token (MAJA) is a global initiative dedicated to developing an array of different programs to combat the criminalization of cannabis. This includes bringing activists and investors together to educate and inform each other, contacting different media outlets with stories from people who cannot get cannabis as medical treatment, paying legal fees for individuals fighting for cannabis as medical treatment in courts of law, campaigning to raise awareness about cannabis as a substitute for harmful and ineffective medicines.

Vision

The vision of MAJA Token is to grow a large community, to be seen, to be heard and to collectively have the power to change. If we can start winning battles in countries and states, that have never been won in present time, we will start a domino effect and win even more battles.

The goal

Cannabis will be recognized for what it is, accepted for what it is and be as normalized as the use of paracetamol or alcohol.

2.0 Team Biographies

Daniel Olav

Founder

The founder & CEO is a blockchain and application developer. He has six years of experience in marketing and a certain degree of experience in web development. A true visionary and caring leader. After a 15-year battle with a long-term condition called Ulcerative colitis, he has been using cannabis in tough times to help reduce his infection. Daniel believes he could not live a normal life and that his health is at great risk without cannabis. This is what drives Daniel most to make cannabis legalized.

Jerry Ek

Marketing Agent & Advisor

Setting up with social media profiles, news magazines, celebrities and corporations. Advising the team with marketing strategies.

Predrag Tasic

Pharmaceutical Consultant

Has many years of experience working with prescription drugs. Has great connections in the medicine and cannabis industry. Providing consultation with his expertise regarding the scientific basis for cannabis use.

3.0 Abstract

Statements

Cannabis is used as medicine for many diseases especially bone diseases

Cannabis helps anxiety and is safer than opiates prescribed for mental illness

Cannabis can relieve stress and chronic pain

Regulating cannabis makes society safer

Legalization can lead to billions of dollars in tax revenue

If not harmful, one should have the right to put anything they want into their own body. The people in charge - running the rules about cannabis, are the least educated on the subject. Tobacco and alcohol which are way more dangerous and hundreds of thousands of people die per year from those substances are legal, yet cannabis with not a single overdose or direct death from consumption is still illegal. The MAJA token can finally, universally unite the people and end the FUD on cannabis.

4.0 Criminalization of Cannabis and Formation of MAJA Token

The effect of criminalizing cannabis makes a lot of innocent people criminals. When people feel like criminals, without doing anything harmful to anyone, they lose hope and trust in the government.

Without hope, without trust, more bad things happen.

Legalization of cannabis is not just about the use of a drug. We believe worldwide legalization of cannabis will do more to this world than almost anyone can imagine.

As we are convinced that legalization of cannabis can change so many lives, and we are convinced that our vision will be world changing for many of us, even if it is just one country or one state on this planet that will legalize cannabis in the immediate future because of us – we know that we were part of starting a domino effect, legalization of cannabis will happen, it is just a matter of when. We want to be here when it happens.

Therefore we founded MAJA Token.

5.0 Tokenomics

MAJA Token (MAJA) launched to the blockchain on the 7th of June 2021. The MAJA contract was set in motion using Binance Smart Chain (BSC) and the contract was verified on bscscan.com immediately after.

The Tokenomics as of 11th June 2021, are as follows:

- 100,000,000,000,000 \$MAJA Total Initial Supply
- 43,073,672,123,376,300 \$MAJA Tokens Burned
- 13,459,470,613,891,200 \$MAJA Tokens in Dev. Wallet (Development/Team Tokens/Marketing)
- 56,926,327,876,623,700 \$MAJA Tokens Circulating Supply

91.38% of \$MAJA Liquidity Locked (remaining 8.62% held by token holders). The initial lock time was set to 1010 days.

Lock Proof: <https://bscscan.com/tx/0xef7006f2417500f9b7dae306284f4d61c74f8095cd32ef30a07e26d4b44716e8>

Transaction Fees

- 1% distributed to holders
- 2% burned
- 0.01% airdrop wallet

6.0 Use Case of MAJA

As a development team, we already see many use cases for the MAJA token that will both stimulate the community and benefit the cause. Holders of MAJA token will be able to vote for actions we take as a project. We will create a webstore with clothes, shoes, hats and other accessories that can be purchased using MAJA tokens. All tokens used for purchasing products in our store will be burned and taken out of circulation forever.

The webstore and voting system will be powered by iOS and Android applications. The more tokens one holds, the more power one has to control the actions MAJA Token takes as a project.

With the project moving forward, we will always try to create more use cases for MAJA. Festivals, concerts, clubs and other gigs may welcome MAJA in the future, as we build more and more partnerships.

7.0 Our Road Map

June - 2021

Launch to BSC Mainnet

20% of total supply valued at 1 BNB was added to liquidity

<https://bscscan.com/tx/0xb65af62953b76d0042ff744f057cf1ff8f2dec10f0d2a89eb44d41c9db2b3a76> ✓

Liquidity Lock

All liquidity was locked

<https://bscscan.com/tx/0xef7006f2417500f9b7dae306284f4d61c74f8095cd32ef30a07e26d4b44716e8> ✓

(As the number of holders increase, we are listing MAJA Token on various platforms)

(New Partnerships and Team Members already in negotiation)

(Upcoming launch of iOS and Android apps)
